

## ***XJS-2N-320 Small Powder Vertical Packaging Machine***

The fully automatic powder packaging machine is suitable for fully automatic packaging of powders or fine particles in products in industries such as medicine, food, daily chemicals, pesticides, and hardware products.

Such as: food additives, milk powder, soybean powder, protein powder, traditional Chinese medicine powder, facial mask powder, pearl powder, coffee powder, cocoa powder, flour, health tea powder, glucose powder, soda powder, etc.

### **Features:**

1. The fully automatic powder packaging machine can automatically complete a series of automated procedures such as bag making, filling, metering, sealing, bag cutting, coding, output, etc.
2. Stainless steel structure, nice and simple design.
3. Chinese and English touch screen control system, easy to operate.
4. Mechanical horizontal sealing action.
5. Simple operation, bag making, metering, filling, sealing and coding are completed in one go.

**Machine parameters:**

Model	XJS-2N-320
Packaging speed	40-60 bags/minute (depending on packaging weight)
Measuring range	1-100 grams (Screw metering, customized according to customer requirements.)
Packaging film width	≤320mm (can be customized according to actual size)
Bag size	Length 40-150mm, width 40-150mm
Sealing type	Back seal (three-side sealing, four-side sealing can be customized, size is negotiable)
Sealing texture	Straight grain
Power supply	220V/50Hz/60Hz/1350W
Machine weight	About 140KG
Packaging Materials	Composite film / composite paper / polyethylene, nylon / polyethylene, polyester / aluminum foil / polyethylene, etc.
Cutter type	Tooth cutter
Air consumption	0.6Mpa 0.4m3/minute
