

SF-100FL Automatic Hot Chili Sauce Spout Bag Pouch Filling And Capping Machine

The spout pouch filling and capping machine is a specialized packaging system used to fill and seal liquid or semi-liquid products into spout pouch.

Features

1. All parts in contact with food are made of 304# stainless steel.
2. Compact design, small footprint.
3. Equipped with multiple sets of detection sensors, it can realize automatic feeding, capping and other processes.
4. Filling and capping are controlled by servo motors with high working precision.
5. Intelligent PLC control, touch screen to set machine parameters, easy to operate.

Specification

Production Capacity	3000-9000 bags/hour
Number of filling heads	6
Filling Range	100-1000ml(Can be customized)
Machine Size	2500(L)*3600(W)*2100(H)mm
Voltage	220V, 50/60HZ
Power	5KW
Air Consumption	0.5-0.7Mpa
Machine Weight	2300kg
