

GG-240(P5) Vertical Roll Film Ampoule Forming Liquid Filling And Sealing Machine

High capacity, high speed, high precision, and advanced motion controller. Stepless frequency conversion speed regulation control. Servo motor controls film traction device.

Human-machine interface, easy to operate.

Automatic unwinding, roll film cutting. It has positive and negative pattern alignment function with photoelectric device. The product is exquisite and beautiful, which meets high standard of packing requirements.

It adopts electronic peristaltic pump device and mechanical piston pump control, which has convenient adjustment.

High filling accuracy with suction back function without any dripping.

The parts contacting with the medicine adopt high quality stainless steel 316L, and the outer cover of the machine is made of SUS304 stainless steel, which meets with GMP standard.

As the bottom of the bottle is flat, so it can stand.

Technical Specifications:

Max. forming depth	12mm
Punch frequency	0-25 times
Packing material	PVC/PE, PET/PE (0.2-0.4) ×240mm
Filling volume	1-50ml

Toal power supply power	7KW
Voltage	380V/50Hz
Machine weight	1200Kg
Overall dimension (L*W*H)	3200×850×1400(mm)
