

FL4350 Automatic 6-Nozzle Overflow Filler

Automatic 6-nozzle overflow liquid filler FL4350 is best suitable for filling with foamy, flammable, corrosive liquid products, or products which require consistent filling level. The number of nozzles can be customized according to your needs, and the filler can also be connected with other packaging machines to build up a complete production line.

Features

1. Lower cost choice with effective productivity.
2. Overflow filling system: No different liquid level problem.
3. Best suitable for filling foamy products at higher speeds.
4. Can be customized for flammable or corrosive liquid.
5. Excess liquid or foam will overflow back to the reservoir.
6. Anti-dripping tray: keeps the machine clean.
7. Controlled by PLC with HMI color touch screen.
8. All liquid contacting parts are made of stainless steel or sanitary materials
9. Made of heavy duty stainless steel construction with casters.

Specification

- Filling speed : 25~40 bpm (depends on product viscosity and bottle size)
- Filling range : 100~4000ml (can be customized)
- Accuracy : $\pm 1\%$
- Voltage : 110 or 220 VAC
