

Automatic Disc type Counting and Filling Machine

The Automatic Disc type Counting and Filling machine is compact, easy to operate and maintain. The photoelectric scanner at the filling station counts the pre-determined quantity of capsules/tablets and automatically stops the rotary disc used to orient the tablets /capsules until the next container is brought below the filling station by means of a conveyor.

Salient Features

- PLC system with HMI.
- No change parts required.
- SS Rotary table with acrylic / polycarbonate hood.
- No-bottle-no-fill arrangement.
- 21 CFR Part 11 Compliance can be provided
