

UN-1600ZS Type Flow Pack Packaging Equipment

The UN-1600ZS Type Flow Pack Packaging Equipment series flow pack packaging equipment is designed and manufactured for the packaging of small products such as candy, and more.

It is a kind of up-film packing HFFS wrapper, and it is also a flow-wrapping machine.

The automatic bowl feeder of UN-1600ZS Type Flow Pack Packaging Equipment has a wide width of 1.2m, which makes the packaged products fall into the feeding device. Moreover, the UN-1600 is equipped with six cutting heads so that it has a maximum packaging speed of 1400bags/min. Compared with the UN-1200ZS, the UN-1600ZS Type Flow Pack Packaging Equipment has a lower empty bag rate, better quality and material utilization.

The vertical sealing device of the UN-1600ZS Type Flow Pack Packaging Equipment is equipped with a traction wheel and one heat welding wheel, which can guarantee high preheat speed and the integrity of packaged products and maximizes the yield

Feature

- The automatic bowl feeder is suitable for the packaging of multiple small products.
- Equipped with an infrared sensor, inspecting the packaging process at any moment to guarantee the integrity of the packaging
- The automatic defect removal system can efficiently reduce the empty bags rate.
- Equipped with rotating cutting head. The cutting operation and packaging operation proceed simultaneously, which improve production efficiency significantly.

Main Specification

Production Capacity	1400bags/min	
Shape of Candy	Square, Ellipse, Oblate,, Globular, ,Plum Blossom-Shaped	
Packing Range	Length	12-50mm
	Width	12-30mm
	Height	5-18mm
Length of Finished Bag	50-120mm	
Gross power	6kw	
Power supply	380v 50HZ 3P/AC	
Gross weight	1500kg	
Overall dimensions (mm)	3700*1650*1700	
Packing Material	OPP/CPP/PET/Al-plastic film/ Paper-rubber complex
