

## ***LDGH500LS Multi Track Irregular Shape Sachet Liquid Packing Machine***

Suitable for liquid irregular shaped bags packing such as shampoos, conditioners, creams, essential oils, sauces, jellies, gels, lotions, concentrated fruit juices, black hair dyes, skin creams, essences , etc.

### **Features:**

- There are two optional materials for the rack. When the stainless steel rack is configured, more than 95% of the parts of the whole machine are made of stainless steel. The exposed appliance is IP6 waterproof. new.
- The use of a swing-arm rubber roller to pull the film (using a servo motor with a planetary reducer) can effectively deal with the filling of liquid-solid mixtures.
- Adjustable pull film up and down to adapt to different bag lengths, different materials and capacities.
- Material detection The electric eye can detect the material position through the film, and can accurately feedback the information during the process of filling the package.
- The eight-character unrolling wheel easily solves the problem of easy discounts on the four-side sealing bag.
- The hexagonal design of the feeding tube, better shape the bag, and strongly ensure the beauty of the bag.
- Horizontal sealing power design has two optional configurations of cylinder power and servo fast horizontal sealing.
- The vertical sealing structure adopts a new type of screw to adjust different specifications.
- Simple and universal paper tray with generous and stable shape design.

**Specification:**

Model	LDGH500LS
Track number	1-4Track
Capacity	20-30 cycle/min
Sachet size	L:50-170mm;W:40-230mm
Sealing type	Irregular shape bag
Film width&thickness	Max.500mm;0.07-0.10m
Filling method	1.Piston pump; 2.Peristaltic pump
Powder supply	220V/380V 50HZ,/5.5KW
Air consumption	0.8MPA 0.8m3/min
Dimension&weight	2600*1350*2350mm,800kg
