

## Automatic Bottle Turning Machine for Filling Line

Automatic bottle can turning machine commonly used in the food, powder and chemical industries. This machine has a simple structural design, but it plays an important role in the packaging process of coding or lid capping.

### Feature

- Automatic bottle can turning machine commonly used in the food, powder and chemical industries. This machine has a simple structural design, but it plays an important role in the packaging process of coding or lid capping.
- This machine has high compatibility and can turn various bottle types, not only plastic, glass, tin and aluminum cans. It can also be used for bottles of different sizes, both large and small.
- The machine can quickly switch products, greatly improving production efficiency. When you want to change the bottles or cans, just make adjustments within 10 minutes, which is very convenient.

### Technical Parameters

Suitable for bottle diameters	30-130 mm
Working power supply	220 V 50/60 HZ
Weight	Net weight: 50 KG Gross weight: 60 KG
External dimensions	1.5 m * 0.5 m * 1.02 m
Total power	0.25 kw
Suitable for bottle heights	25-30 cans per minute
Bottle-flipping speed	25-30 cans per minute
