

DZQ-850S Automatic Chamber Belt Beef Vacuum Packaging Machine

The DZQ-850S is a single-chamber three-dimensional vacuum packaging machine. It contains two 850mm sealing strips. The form of automatic conveyor belts enables the machine to adapt to the continuous operation of the packaging production chain. It can be compatible with packaging machines such as hot water shrink machines.

Product Description

Advantage

- The chamber is equipped with a continuous conveyor system, allowing it to connect with a production line.
- The industrial vacuum sealing machine features a stainless steel cover.
- The stainless steel cover uses pneumatic principles for opening and closing.
- The industrial vacuum sealing machine is equipped with a 200m³ vacuum pump for greater suction power.
- The vacuum sealing machine can be integrated with meat vacuum hot water shrinking production lines.

Description

The Vertical Vacuum Machine is designed to efficiently remove air from vacuum bags or pouches and create tight, secure seals, extending the shelf life of products by protecting them from air, moisture, and contaminants. This machine is ideal for packaging a wide range of food items, electronics, pharmaceuticals, and other products that require airtight sealing. With its vertical design, the machine is perfect for small and medium-sized businesses looking for a compact yet

powerful solution for vacuum packaging. Its efficient operation and reliable performance make it a great choice for businesses looking to improve product quality and packaging efficiency.

Technical Parameters

Model	DZQ-850S
Voltage	380V 50-60Hz
Pump Power	4kw
Pump Capacity	200m ³ /h /Option
Sealing Length	850mm (x2)
Sealing Width	10mm
Cover Size	850x500x250mm
Dimension	885x940x1205mm
Weight	≈420kgs
Certification	CE ISO
