

SH-AFC34 Automatic Double Heads Piston Pump Hair Mask Conditioner Nail Varnish Remover Liquid Paste Monoblock Filling Capping Machine With Feeding Pump

Main Feature

- ▶ The cam system enables all working components to work simultaneously, effectively improving production efficiency.
- ▶ Equipped with PLC touch screen control panel, machine debugging and operating will be more intuitive.
- ▶ Filling work is controlled by servo piston pump, machine operation will be more convenient
- ▶ Can be connected with automatic labeling machine to finish complete packaging production work
- ▶ Feeding pump can be optional as production need, it can improve working efficiency.

Parameter

- Power: About 4.2 KW (220V 50Hz)
- Cover size: Customized
- Bottle size: Customized
- Filling range: 200-300 ml (can be customized)
- Filling pump: Double-head servo piston filling
- Filling accuracy: About $\pm 2\%$
- Production efficiency: 30BPM (based on filling volume and filling material)
- Working air pressure: 0.6-0.8mpa
- Machine size: About 2300*1500*1700 (mm)
- Machine weight: About 800kg
