

LGYF-1500A Continuous Induction Sealer

This series of machine of transistor circuit control, the characteristics of low coat, simple operation, easy to use. Mainly used for bottle with threaded plastics, glass bottle of bottle etc. Nonmetal induction membrane sealing operation. Applicable to large and medium sealing job. Batch continuity, Not suitable for acid. Alkalinity. High humidity and dust more harsh environments (such as pesticides. SAN, etc) for a long time. These series machines are suitable for single homework, do not use in line connected.

Technical parameter

Model	LGYF-1500A
power supply	110V/220V 50/60HZ
power	1.5KW
capacity	0-10 m/min
sealing diameter	20-50mm
suitable height of bottle	40-200mm
machine weight	38KGS
machine size	1150*480*400mm
