

VFFS320 Vertical Form-fill-seal Packaging Machine

Form, fill and seal pillow bags from roll stock film up to 320 mm wide. Configure the feeding and dosing system around your product and pack size.

What the VFFS320 brings to your line

Rollstock bag forming

Forms the bag from thermoplastic laminated film, then seals and separates each pack.

PLC & touchscreen control

An operator interface brings machine settings together for day-to-day operation.

Product-specific dosing

Match the feeding and dosing equipment to the product, target weight and required output.

Specifications

Model	VFFS320
Maximum film width	320 mm
Bag format	Pillow bag
Film	Thermoplastic laminated film
Sealing	Vertical and horizontal heat sealing
Controls	PLC & touchscreen HMI
