

## *FSJ-150 mini granulator*

FSJ-150 mini granulator is the latest researched product, the whole working process is carried on in the closed vessel, it effectively prevent the product contact with outside, avoid the material contamination, the machine comply with GMP in pharmaceuticals industry.

The machine features of compact structure, suitable design, stable running, even granulation, easy operation, etc. the machine comply with the solid production processing requirement, it is the best production equipment for sterile solid granulation.

### **Features:**

- Both dry material and wet material can be used for processing
- Innovated rotation system can use for mass flow processing
- Firmly mesh net can prolong the serving life
- Design according to GMP.
- More safe than material class

**Main technical parameter:**

Rotator (scraper) speed	150-920 rmp
Motor	JW7146 0.55 kw 920 rpm
Sealing	35x20x6 (26x15x6)
Inverter	6SL3210-5BE17-5UV0
Productive capacity	10-50 Kg/h
Mesh size	φ0.8;φ1;φ1.5;φ2;φ2.5 (made according to user requirement)
