

ZTK-320 Automatic Multi-lines Packaging Machine

ZTK-320 Automatic Multi-lines Packaging Machine is suitable for packing of granular of medicine, food and chemical products, powder and water-bindered pills, etc. Such as medicine granular, sugar, plant seeds. Silica gel, tea, etc.

Features:

- All the parts contacting with product is made of 304SS. And this machine is completely closed when running, which meets to GMP standard by pharmacy.
- High-precision of pulling film system, PLC, advanced touch-screen, automatic photo electricity tracked PID and digital thermostatic control, etc adopted by this machine.
- The machine is easy operated and perfect structured which is the first choice of higher production efficiency, reducing labor intensity and higher packaging level.
- Packing film: PET/PE, ET/PETAL/PE, PET/AL/PE, PAPER/PE, NYLON, and etc heat-sealable materials.

The working principle and process:

Packaging materials are released export volume institutions that are at the back of the body. After the release of roller the print of volume batch, longitudinal, forming and sealing are finished. Meanwhile materials are filled and sealing process is done, and then through horizontal closure, cross-cutting, the formation of products is complete.

Main technological parameter:

Max width of film (mm)	900mm
Cutting number (vertical rows)	4、 6、 8、 10、 12
Power	220V 50HZ 3.2KW
Total Power	3.2 KW
Compressed air pressure	0.6 Mpa
Noise (dBA)	78 dBA
Dimension (L*W*H)	1100*1200*2200 (mm) (4 lines)
Capacity of per-line	15-40 bags/min
Weight (kg)	600kg-800kg
Automatic process of producing	Filling, cutting,etc
