

Three Side Sealing Liquid Packing Machine DXD-Y80C

Characteristics:

1. The fully automatic three side sealing liquid packing machine comes with PLC programmable control and an English and Chinese display screen, making it easy to operate and maintain. It is easy to adjust.
2. A photoelectric tracking system and two-way compensation function of the three side sealing liquid packing machine ensure correct and accurate double-face printing and counting.
3. The liquid packer shell, made of full stainless steel, is highly corrosion proof, easy to clean, and meets GMP requirements.
4. The packing machine uses measuring cups for granule feeding, screw type powder feeding and a piston pump for measuring in liquid feeding.
5. For cutting, flat cutting, fracture line cutting or saw-tooth cutting can be chosen. A ribbon coding machine is optional.

Usage:

The three side sealing liquid packing machine is used for packing liquid materials such as ice lolly, soy sauce, vinegar, wine, medicine, chemical agents and so on, providing measuring and automatic packing into sachets. It is used in the medicine, food, and daily chemical industries.

Main Technological Parameters:

Item / Model	DXD-Y80C
Pouch length	50-120mm (adjustable)
Pouch width	40-80mm
Packing speed	30-60 times/min
Filling capacity	1-50ml /bag
Cutting	Flat cutting, with tear notch
Applicable film	PET/AL/PE, PET/PE, NY/AL/PE, NY/PE/aluminize/complex film
Electric source	380V 50Hz (as per customer's request)
Total power	1KW
G.W.	260 Kg
Package size	1100*800*1600mm (L×W×H)
