

## *Six series Powder Packing Machine*

This automatic packaging machine can automatically complete the automatic measurement, automatic filling, automatic bag making (printable), sealing, fixed package cutting, etc.

Adopting advanced technology and humanized design, Japanese "Panasonic" PLC+5.7 touch screen control system, high degree of automation;

Fault self-alarm, self-stopping, self-diagnosis, simple operation, quick maintenance, automatic display of packaging quantity, easy to calculate the workload of the machine;

The working principle of hot sealing bag is adopted, and the film is controlled by the motor.

High sensitivity electric eye can be used to automatically track and locate the printing cursor.

Adopt integral mould frame, adjustment is more convenient;

The machine is made of 304 stainless steel and aluminum alloy (in accordance with GMP standards).

Piston type filling device, high filling accuracy;

The universal wheel and adjustable foot cup make it convenient to change the position and height of equipment.

If you need automatic feeding device, finished product output conveyor, please choose additional;

## **Technical parameters:**

1. Packing material: powder
2. Metering device: optional screw, measuring cup, liquid metering pump
3. Packing capacity: 1-50g
4. Number of packing columns: 4-6
5. Bag size: bag length: 60-200mm, edge width: 10mm
6. Packing speed: single line speed 30-50 cut/min (packing speed depends on the filling)
7. Maximum membrane width: 480mm
8. Bag type: back seal bag
9. Pull bag mode: servo motor pull film
10. Cutting mode: flat cutting or R Angle cutting
11. Packaging materials: aluminum foil film, PE composite film, etc
12. Voltage power: 220V/50HZ 5KW
13. Air pressure: 0.6mpa
