

## *Automatic Sticker Labeling Machine ES-PP*

Suitable for the card and carton industry, have the functions of automatic point materials, labeling, automatic receiving to paper card, magnetic card, credit card and unformed paper box.

Use the servo motor, increase the labeling speed and accuracy.

### **Functions and features:**

Meet the requirements of lateral, vertical printing and labeling on a variety of specification sizes of standard card and other cards.

Paper box point material design has a wide range of applications and easy adjustment (only need to adjust slightly it can reach the labeling requirements to the paper box with different specifications)

More humanized touch screen: Chinese and English display, easy to operate, intuitive, complete functions.

More integration compact structure, small beautiful appearance, easy installation and maintenance.

Use with the printer or inkjet printer synchronously, realize supporting the use of various production logo.

Use the imported electronic components of the world famous brand, make sure the stability and reliability of SONSEN labeling machine.

Have strong labeling data memory store function, which can freely switch between 50 groups of different parameters without the need to reset.

Effectively prevent the problems of fail labeling, wrong labeling, re-pasted may caused by the label roll (label intelligent management, warning prompts and the optional image detection system)

**Technical parameters:**

- Machine size: 1960\*900\*1900mm
- Labeling accuracy:  $\pm 1.0$ mm (not including the error of object being pasted and label)
- The diameter of the object: 20-300 mm
- Labeling speed: 50-300 bottle/minute (according to the bottle size and label length)
- Power supply/power: 220/380VAC  $\pm 5\%$ HZ 1.2K
- Conveyor belt length: 240 mm
