

SFJ-2 Screw-Type Automatic Feeding Machine

This machine is a automatic screw feeding machine, material is sent to the hopper by the rotary movement of screw (auger). Connected with level switch, it can feed automatically under the control of PLC. This machine can be used with our company's DXD series of powder filling packaging machine. It is the ideal auxiliary equipment.

Performance advantages:

- ◆ Operation interface - touch Settings on the main device used in the matching touch screen
- ◆ Electrical components – using the internationally well-known brands to ensure the equipment is safe and reliable
- ◆ Function advantages - supporting the use of DXD Series powder machine, automatic material feeding when empty, automatic stopping when full, realizing automation control.
- ◆ Stepless speed change: Based on production needs it can be realized on adjustable feeding speed.
- ◆ Mechanical parts - the main parts of the machine are made of high quality stainless steel 304.
- ◆ Maintenance situations - the machine meets the GMP requirements, easy to disassemble, clean and maintain.

Technical parameters:

- ◆ Power supply: 380 V/50 Hz
- ◆ Power: 0.37 KW
- ◆ Dimension: 800×600×2000 mm
- ◆ Weight: 280 kg
