

JC-2000L Cellophane Wrapping Machine

The Production Line Cellophane Wrapping Machine is a customized device, which is fit to existing equipment specifications, so as to achieve the idea of fully-automatic Production Line.

- Cellophane overwrapping machine is an universal equipment which can wrap kinds of hard paper package box or package by using OPP film. Cellophane film and pulling strip (tear tape device) with pattern and characters or holographic laser mark stuck with Nondrying gum and facilitate to open easily the finished products, and provide the anti-false function.
- BT-2000L The Production Line Cellophane Wrapping Machine is used to supply packaging items by material storage or conveyor belt, and a series of mechanisms such as paper (film), paper (film), folding, sealing, heat sealing, shaping and discharging are used to complete the wrapping of packaging items.
- The two sides are folded and bonded by heat sealing, so as to achieve the packing effect of sealing, moisture-proof and decoration.
- Transparent paper (film) with a printed text and text or holographic light removal logo folding line (commonly known as gold line, open line), after adhesive paste.
- It can facilitate the folding and anti-counterfeiting of finished products.

Technical Parameters:

| Model | JC-2000L |
|---------------------|----------------------------------|
| Production capacity | 20-60 packs/min |
| Packing dimensions | (L)40-200mm(W)20-120mm(H)10-50mm |
| Power supply | 220V 50—60Hz |
| Motor Power | 0.75Kw |
| Electric heating | 4Kw |
| Overall dimensions | 2700mm×975mm×1490mm(L×W×H) |
| Weight | 1000Kg |
