

Automatic Continuous Plastic Bag Sealing Machine with Coding Printer FR-900

This machine works on plastic bag of Polyethylene, Polypropylene & Polyolefin Compounds in all sizes.

Electronic temperature control system and automatic transmission device can control a variety of different shapes of plastic film bags, can be used on a variety of supporting packaging lines, sealing length unrestricted.

Sealing can be done with Production date code, save labor and improve efficiency.

For medicine, pesticide, food, cosmetic, lubricating oil and other industries of aluminum foil, plastic bags seal bags.

The machine can operate for dry food horizontal sealing, vertical operations can be applied to liquid goods packaging sealing.

Specifications

Model	FR-900
Sealing Width	6mm-14mm
Sealing Length	0~Limitless
Film Thickness	0.03-0.8mm
Printing Words Number	39
Sealing Speed	Max. 12meters/min
Temperature Range	0~300°C
Conveyor Size	775x140MM (LXM)
Conveyor Load	Max. 3.kgs
Power	600W
Voltage	220V 50HZ/110V 60HZ
