After the labeling machine operates, the labeling rod sticks resin adhesive firstly, then the label box transfer labels to the labeling rod, after rotating, labels will be sucked to the vacuum belt through vacuum suction, then labels will be posted completely on the bottle.

Technical Parameters:

Model	HJY-100
Capacity(BPM)	40-100
Diameter of bottle	30-110 mm
Size of label (L*H)	50-330—40-150 mm
Vertical error	±1
Labeling rate	≥99.8%
Power supply	380V three-phase,50HZ
Motor power	1.0KW
Gas consumption	4-6kgs/Min
Glue	Water-soluble phenolic resin adhesive
Net weight	350KG
