

Continuous Sealing Machine

These Machines have an automatic conveyer system. These machines have very superior than any other conventional impulse sealer. This machine can pack highest number of packets in minimum time. It is easy to use and can be operated by any layman. This Continuous Sealing Machine is very advantageous as it seals packets horizontally as well as vertically. The size of the packets to be packed can be changed as required.

Features:

- Outstanding finishing
- Improved Production
- High speed
- Superior to any traditional sealing machines
- Easy to use
- Seals horizontally and vertically too

Applications:

Appropriate for sealing packets of

- Food
- Pharmaceuticals
- Cosmetics
- Chemical Products
- Electrical Components
- Seeds

- Groceries
- Snacks

Technical Specification:

Sealer Width	3 mm to 12 mm
Speed	10 to 50 pouches per minute
Packing Material	Polyethylene & any heat sealable, flexible laminated material.
Sealt Type	Impulse / hot bar.
Power	½ HP Motor, 220 V, 50 Hz, Single Phase.
Net Weight	380 - 450 Kgs. (Approx)
M/C. Dimension	1220 x 840 x 1960 mm (L x W x H)
