

JLP-100 Automatic Bottle Unscrambler

JLP-100 Automatic Bottle Unscrambler is made up of the bottle holder, unscrambling plate and bottle stand. It is applied to the bottle unscrambling of plastic round and flat bottle. When putting the disordered bottle into the bottle holder, through the unscrambling plate, then the bottles will be in the filling line in order. The machine has the features of simple structure, easy operation and good stability. It can reduce the labor force. It is your ideal choice for unscrambling the small bottles.

The machine has the automatic coordination function. When the sensor checks the jam before the filling machine, the bottle unscrambler will stop. After the jam problem solves, it will restart working.

Technology Parameter

- 1 Applicable Bottle Size : 10-500ml Round, Flat Bottle
- 2 Capacity : 30-60 bottles/min
- 3 Power : 0.5Kw
- 4 Power Source : 220V 50Hz
- 5 Amount of Air-consuming : 0.3m³/min
- 6 Weight : 350KG
- 7 External Dimension : 900×900×1200 (mm)
