

Granule Filler Machine

The granule filling machine is mainly suitable for granular, powder particle shape, strip, block, packaging and other materials. Such as coffee beans, rice, beans, wheat, pesticide, fertilizer, feed, Chinese herbal medicine, Chinese medicine granules, premix, washing powder, snack food, candy, melon seeds, peanuts, salt, MSG, chicken essence, seeds, grain, quantitative filling hardware packaging and other granular materials.

This granule filling machine has two scales, it's sensor weighing to fill the granule.

This granule filling machine can work together with the screw feeder, high working efficiency and labor saving.

For the granule filling machine, we have different capacity, such as 30-2000g, 500-6000g, 2-10kg, 4-25kg, 5-50kg, and 200-1000kg,

So please tell your detail request, we can recommend the most suitable model for you if you want to know more information, welcome to connect us freely.

Features

- PLC control, easy to operate and LCD touch screen.
- High precision electronic balance weighing
- Full stainless steel structure, easy to clean
- Vibrator feeder, fast speed, high accuracy

Function

Open electronic scale, the filling machine will automatic zero peeling the weight of the alarm.

The weighing errors can be automatically corrected; the vibrator amplitude and voltage are adjustable.

Packing data can be remembered in 99 different kind, next time you can use it directly very convenient.

Technical parameters:

- Measuring range: 30-2000g/scale
- Filling speed: 0-30bags/m
- Filling accuracy: $\pm(0.2\%-0.5\%)$
- Voltage and power: AC220V/50Hz/500W
- Dimension: 110×82×190(cm)
