

Auger Filling Machine FRJB

In order to provide more alternatives for customers, we have developed an economical model of Auger Filling Machine. We considered its minimum “should have” features and finally achieved this solution at very affordable cost even kept as made-in Japan for most of general powder filling application. As the combination with our vertical form fill seal machine, it will be competitive auger filling packaging solution from Japan. This is also very suitable as an entry model for those who would like to automatize its production line. This auger filling machine can also be used as stand alone combined with other VFFS machines once its communication is made.

Specifications:

Filling range	5g - 2000g
Filling speed	Max. 70 fillings/min
Machine Dimensions	W 600 x D 1300 x H 1370 mm
