

DGD-180BJ Automatic Horizontal Pouch Packing Machine

The DGD-180BJ Automatic horizontal Pouch packing machine is independently developed by our company. With more than ten years of accumulation and precipitation by customers in the industry, it has created a stable and reliable intelligent packaging equipment.

Use an integrated programmable control system. It realizes the automation of the process from bag taking → bag opening → inspection → filling → sealing → finished product. The machine has a reasonable design and a novel appearance. The automatic filling of various materials such as powder (powder, premix) and granules can be realized on this machine by replacing the filler. Integral SUS304 frame with glass door cover, reliably sealing.

Technical Parameters:

Capacity	40-55 Pouches/Min *Actual capacity: According to product size, packaging material, material characteristics, etc.
Applicable Pouches Size	Min 80×100mm,Max 180×210mm
Volume	≤200g *According to the physical properties of the raw materials and the different feeding devices.
Precision	±1g *According to the physical properties of the raw materials and the different feeding devices
Power supply	3P AC380V 50Hz/4.5KW
Air pressure	0.5-0.7MPa
Dust Diameter	Φ59mm
External Dimension	2405×1835×1400mm(L×W×H)
Weight	About 1800Kg
