

## Shrink Sleeve Labeler SLX-100

Shrink sleeve labeler applicators are mandrel style machines that use servo motion control to deliver consistent, repeatable performance. Container changeovers are tool-less and require less than ten minutes depending on product sizes and shapes. We also offers a full range of shrink sleeve applicators for low, medium and high speed production environments.

All shrink material applicators are capable of performing up to five key sleeving applications:

- Full body sleeves
- Full body over-the-cap sleeves
- Partial body sleeves
- Tamper evident bands
- Multi-packs

SLX-100 sleeve applicators and systems are used in a wide variety of industries including fluid milk, craft beer, ready-to-drink beverages, cosmetics, home care products and personal care products. The flexibility and reliable performance makes them one of the best values in the shrink sleeving industry.

### Specifications:

Model	SLX-100
Speed	Up to 200 cpm
Film Layflat Range	50mm-200mm
Container Diameter or Multi-pack Cross Section	30mm-125mm
Applied Film Materials	PVC, PETG, OPS,PLA
Input Power	3kw
Input Voltage	3P, 380/220V
Film Thickness	0.04mm~0.07mm
Dimensions (L*W*H)	2000mm×850mm×2000mm
Weight	600kg
