

Full Auto Vacuum Rotary Packing Machine

Full Auto Vacuum Rotary Packing Machine is a new product which self-developed by our company. This machine can use manipulator to automatically get vacuum bags, open bags, print date or batch number, feed products, vacuum packing, etc. so that can be with no-man operation and can do fully automatic package. Bag length can be 100-240 mm, width can be 70-140mm.

The capacity can be 2000-3000bags/hour.

This machine can pack different products with different feeding device. For example, can vacuum pack liquid & ointment into bags if with liquid & ointment measurable filling system; can vacuum measurable pack powder and bulk products if with multi-head weightier; can weight and vacuum pack nubby products if with automatic loading device etc.

This machine is controlled by PLC, with touch screen operation, can monitor whole machine. If there is abnormal situation, like empty bag or no bag come etc, PLC will judge it, send out signal and control machine to do corresponding measures, so that avoid to waste product or bags.

	Unit	Parameter
Capacity	bags/h	2000-3000/h
Bag size	m	60-180 * 70-140mm(L*W)
Electrical source	V	3phae 380V 50HZ
Power	KW	15
Compressed air	MP	0.6-0.8Mpa (flux 0.2m3/min)
Vacuum pump	l/h	500L/hour
Overall size	mm	2700*1600*1700
Machine weight	Kkg	1500
Sealing type		momentary heat-sealing
