

Semi Automatic Lipstick Silicone Demould Machine ACZ-TM

The Lipstick Demould Machine is specially designed for the demolding of lipstick. Put the inserted lipstick tube on the machine and assist the demolding of lipstick by means of air holes.

This Lipstick Demould Machine is suitable for the demolding work of columnar lipstick, lipstick and other pastes. It has the characteristics of fast demolding speed, stable demolding, simple and convenient operation, etc.

Main features:

1. The Lipstick Releasing Machine is designed for silicone rubber lipstick demolding device. After artificial insertion of red tube, put the machine on the top, dial the mold and release the mold.
2. The Simple Lipstick Stripping Machine is convenient for the workers to operate.
3. Reduce the production process, improve work efficiency.
4. The volume is light and no space.
5. It is easy to maintain and clean up.
6. Lipstick Production Line: Three-Roller Grinding Mill Rolling Machine, Lipstick Making Machine, Manual Lipstick Filling Machine, Cooling Platform, Lipstick Demould Machine, Lipstick Packing Machine

Parameter reference:

power supply	220V,50Hz/60Hz
Air Supply	0.3-0.6Mpa
Power	100W
Working height	840mm
Sterpper quantity	8-12 Holes/time (It depends on the mold)
Body material	304 Stainless steel
Production capacity	3-5 times/Min
Dimension (LxWxH)	600*400*1240mm
Net weight	55kg
