All-Servo System Packaging Machine **DXD-380C**

The all-servo system packaging machine is suitable for packing biscuits, moon cakes, cakes, bread, fast food noodles, soaps, frozen food and other like products.

Main Features:

A. The all-servo system packaging machine provides servo intelligent zed control and low noise, which makes comfortable working environment.

B. The flow type packaging machine accomplishes the whole process of feeding, forming, filling, sealing, and delivering automatically.

C. The packing machine makes use of touch screen, which offers user-friendly man-machine interface, clear parameter display and easy, menu operation.

D. With synchronous film conveying and horizontal seal, the all-servo system packaging machine achieves perfect seal.

E. The flow type packing machine, with a broad length range, suits for packing many kinds of products.

Main Specifications:

Machine name		All-servo System Flow Type Packing Machine	
Production capacity		35-130bags/min	60-260 bags /min
Packing range	The length of bags	190-450mm	90-270mm
	Width	40-140mm	40-140mm
	Height	1-60mm	1-40mm
Gross power		3kw	
Power supply		220v	
Gross weight		700kw	
Overall dimensions(L×W×H)		3500*1000*1500mm
