

## Automatic Carton Packaging Machine GF1509

GF1509 Wrap Around Carton Packing System can finish the process of the cardboard sucking, product Packing and carton forming.

### Introduction:

- a. It can finish the process of the cardboard sucking, product packing and carton forming all-in-one, this is highly efficient to save lab our cost.
- b. The trays can be rectangular, with walls having either the same height or different heights.
- c. It is independently developed based on advanced technology.
- d. It is widely used for beer, wine, cigarette, soap, instant noodle, floor, and canned drink& food etc.

Compared with traditional packing, wraparound case packer has the flowing advantages:

- Effectively protect the products, like moisture-proof, heat dissipation and easy to carry, etc.
- Easy to adjust the machine when change to different size of product.
- Save 15% of the raw material, reduce the cost of the carton.
- Reduce the labor cost, only 1~2 labor needed.
- Save space, it`s a good solution for small workshop.
- environment friendly, the finished carton will be sealed by hot melt glue, which is more healthy and beautiful compared with normal tape sealed carton, which is good for product promotion

### Technical Parameter:

Model	GF1509
Power Supply	220V/380V 50/60Hz 8KW
Applicable Carton Size	L200-350*W300-450*H100-300mm

Packaging Speed	12-20 cases/min
Height of platform	750±50mm
Air Source	6-7KG
Machine Size	6000*2200*1900mm
Control Power	DC24V
