

## Automatic Capping Machine for Tin Can

### Application:

Automatic capping machine suits for plastic cans, aluminum cans, such as the sauce, sea food can, fruit can, vegetable can, bean products can, etc.

### Features:

This automatic capping machine for nuts/cookie/beer/beverage is suitable for ring-pull can, pop-top can, suits for seal pp, pet, pe paper and metal can with aluminum foil lid, TFS or iron lid, beverage can etc.

The automatic capping machine can dropping cap, sealing cap automatically, which can be equipped with labeling integration.

The automatic capping machine is economic, broad applicability, easy operation, reliable and mobility.

### Technical parameter:

Voltage	220V
Power	2.2kW
Operation Mode	Automatic working method
Working speed	40-60 times/min
Can diameters	40-150mm
Can height	40-200mm
Size	3800*900*1300mm
