

Pillow Type Hard Candy Packaging Machine CK-1000A

The packing capacity of the hard candy packaging machine is very strong, suitable for a variety of specifications, for food and non-food continuous type. The candy packaging machine can not only be used in the packaging of non-trademark packaging materials, but also can be used in the high-speed packaging of pre-printed logo roll materials.

The candy packaging machine is specially designed according to the characteristics of candy, with automatic feeding device, no need for manual feeding. Suitable for different shapes of candy.

Features of Candy Packaging Machine for Sale:

- The machine is controlled by touch screen. The main control circuit USES intelligent chip for precise measurement. It can automatically detect the failure of electrical equipment. The operation is very simple.
- The hard candy packaging machine is a high quality dual conversion simple mechanical structure, less wear, long life.
- It can detect and track high-precision photoelectric, bi-directional automatic compensation, accurate and reliable.
- The bag length does not need to be set manually. The equipment automatically detects it and sets it during operation.
- Packing speed and bag-making length are controlled by double frequency converters, stepless speed regulation, and can exactly match the previous process of the production line.
- The conveyor is made of stainless steel and painted.
- The candy packaging machine for sale has high packaging efficiency, stable performance, convenient operation and maintenance, low failure rate.
- Can run continuously for a long time, with good sealing performance and exquisite packaging effect.

Candy Packaging Machine Use:

It is mainly used in the automatic packaging of small block products, such as candy and chocolate. Strong applicability, fast packaging speed. This pillow hard candy packaging machine has a very broad market space in the packaging machine industry.
