

Plastic Injection Molding Machine WB-338PET

This plastic injection molding machine is specially working with the PET preform mould to make the preforms. Different mould specification choose different machine model.

Feature

- Special designed PET screw & barrel, high increases the plasticizing speed and shot weight, lowers the plasticizing temperature and AA valve. Also significantly improves the shrinkage of preform, which achieves better transparency.
- Variety PET injection molding machine specification, suitable for different kind of PET preform moulds.
- Stable performance and highly productivity. Increasing ejecting tonnage and ejector stroke.
- With optional synchronous pressure retaining system, can improve 15%~25% more capacity
- Providing full range of PET bottles technology and equipment, including PET injection molding machine, PET blowing machine, PET preform mould and the related equipment's.

Technical Parameter

Model	WB-338PET	
INJECTION UNIT		
Screw diameter	mm	70
Shot weight	g	1270
Injection pressure	Mpa	156
Injection rate	g/s	350
Screw L/D ratio	L/D	24.1
Screw speed	r.p.m	190
