

WP-100/160 Powder Filling Machine

The Talcum powder filling machine type, number of machines, speed, capacity, size, etc. Of the production line can be customized according to the customer's Production needs. We can develop a professional integrated filling and packaging production line plan for the customer.

Main features:

- Two motors used for feeding and vibrating, separately controlled
- Product with vibrator to make material to be flowing easily
- SS304 structure, inner auger fixed or unloading easily without tools
- Reversible, dismountable auger and discharge gate insure easy cleaning
- Standard model with transparent plastic cover to avoid dust falling into hopper, stainless steel cover for option
- Rotary base or fixed base for option
- Less malfunction rate, long time using life

Main technological parameter:

Talcum powder filling machine Data	
Turn table diameter	Dia.900mm, H: 750mm
Filling type	Auger screw
Feeding range	500-1000g
Max filling speed	800-1200BPH (1000g)
Motor Power	220V, 50HZ, 2.2KW Single phase
Weight	660KG
Dimension (L*W*H)	1200*900*1800mm (Can adjustment)
