

Pressure Filling Unit DCGF18-18-6

Suitable for gas beverage filling. The washing, filling and capping three functions, to achieve full automation, suitable for polyester bottles and PET bottles cans of soda drink; you can use a variety of bottle type, the card bottleneck technology, changing the bottle only by adjusting the height of conveyor chain, convenient operation. Filling the new micro pressure filling. The filling speed faster and more stable, compared with the similar equipment, this machine with higher yield, low failure rate.

Applicable industry: Catering, food, cosmetic, medicine, tobacco, chemical, gas beverage.

Technical Parameters:

Model:	DCGF18-18-6
Filling volume:	250-2000 (ML)
Suitable bottle size:	50-100 (mm)
Filling accuracy:	99 (%)
working principle:	Isobaric
Power:	4.5 (kw)
Number of filling head:	Eighteen
Bottle height:	150-320 (mm)
throughput:	2000-5000 (cans per minute)
Size:	2400*1900*2300
