

Premade Pouch Packing Machine TH-PM-R-G-200

This premade pouch packing machine is widely used in solid particles of various shapes with good fluidity. Such as nuts, seeds, popcorn, potato chips, snacks, mini-cookies, biscuits, red date, peanuts, candy, pet food, and many kinds of hardware's.

This premade pouch packing machine is mainly composed of a bag-type automatic packing machine, an electronic combination weigher, Z type bucket elevator, and a working platform.

This premade pouch packing machine is suitable for many kinds of premade pouch, Stand-up bags, handbags, zipper bags, four-side sealing bags, three-side sealing bags, paper bags, M-folding bags and other composite bags.

The features

1. Wide range of packaging: suitable for solid particles of various shapes.
2. Advanced PLC intelligent control system, man-machine interface setting, easy operation.
3. Convenient adjustment: the replacement of various accessories can be completed in about ten minutes.
4. Suitable for different types of packaging bags.
5. Perfect prevention system to ensure the yield rate, without wasting bags and materials.
6. The packaging part of the machine is made of stainless steel to ensure the sanitation and safety of the materials and comply with GMP standards.
7. High degree of automation: fully automated and unmanned operation in the whole process of weighing and packaging, and automatic fault alarm.
8. Imported engineering plastics are used, no need to refuel, reducing material pollution.
9. Use oil-free vacuum pump to avoid polluting the production environment.

Technical parameter:

The model	TH-PM-R-G-200
Machine material:	Stainless steel 304
weighing hopper capacity	10 /14 heads , 2.5L
Bag Width	100-200mm (adjustable)
Bag Length	100-300mm (adjustable)
Packing range	50-200g
Packing speed	20-50bags/min
Power supply	4.5Kw, AC380V, 50/60Hz
Z type elevator	Plastic hopper bucket(Food safety grade), other part(frame & surface) is SUS304;
