

Semi-Auto Granular Filling & Sealing Machine – CE-50K-S15

CE Series Semi-Auto Electronic Weighing machine is designed with hopper, vibrating feeder, weighing device, weigh hopper, door-opening device etc. It can be used to form a production line with elevator, belt conveyor, bag sealer/band sealer. The elevator elevates the product to the feed hopper of the weighing machine.

Features:

1. The product is elevated to the feed hopper of the weighing machine by the elevator.
2. Automate the process of weighing, conveying and sealing.
3. Very easy to operate and maintain.

Application:

CE electronic weighing machine is used to pack bulk materials in the fields of cereal product, feed processing, cement chemical etc.

Technical Parameters:

Model	CE-50K-S15
Voltage (V/Hz)	415V, 3 Phase
Gas Source Pressure (kg/cm ²)	6
Weighing Range (kg/bag)	1~5KG
Weighing Speed (bags/m)	05.дек
Weighing Accuracy	±0.2%
Machine Dimension	3000mm x 2000 x 2300mm(H)
Packing Bag Size (mm)	Bag top width 400~600 Bag length 700~950
