

XH-20 CSB Ultrasonic Seal Activated Carbon Packing Machines

Application:

This charcoal packaging machine is suitable for nonwoven fabric material, can fully automatic make nonwoven bag products with different bag types and sizes, as box bags, Model XH-20CSB packing machine is suitable for loose rounded granules in the food, chemical and other industrial. Such as: puffed granules, peanuts, melon seeds, rice, pepper, sugar, biscuits, etc. According to customer needs, the bag types can be changed.

Features

1. Specially used to pack carbon bags for active carbon, bamboo-charcoal, and other drying agent. Powder materials can be packed as an alternative.
2. Specially adopting the ultrasonic sealing method to seal non-woven fabric, for neat cutting and sealing performance.
3. Fully automatic machine with filling, weighing, cutting, sealing and date printing. Eye-mark tracking function for more precise cutting size.
4. Bilingual touch screen controlled by imported PLC for easy and simple operation.

This packaging machine, with optional filling system: auger filler, measuring cup, electronic scales, etc. is widely applied for packing activated charcoal, foot bathing powder, seasonings, coffee powder, tea and so on. By advanced fully ultrasonic sealing technology, could achieve airtight sealing and smooth cutting appearance for non-woven material bag. Automatic completion of measuring, bag making, filling, sealing, cutting and printing codes.

Parameter:

Model	XH-20 CSB
Packing speed	40-60 bags/min
Range of measurement	3-15ml
Bag size	(L)50-75mm (W)55-75mm
Power	1.6KW
Driven Type	Pneumatic
Total power	220V/50HZ
Packing material	Paper/the polyethylene, nylon/polyethylene, tea filter paper, etc
Net weight	300kg
Overall dimensions	(L)640*(W)750 *(H)1850mm
