

Automatic Portable Vacuum Packing Machine SS-500

- Vacuum sealer of SS series is used for removing air from the package and automatically sealing.
- Vacuum packing reduces atmospheric oxygen, limiting the growth of aerobic bacteria or fungi, and preventing the evaporation of volatile components.
- The sealing length of machines have been mentioned in their models.
- This machine can be adopt Germany BOSCH vacuum pump.
- We can also customize according to your request.
- APPLICATION: of vacuum packaging machine: Meat, seafood, vegetables, fruit, electronic components.

Specification:

Model	SS-500
Vacuum pump power	0.9 Kw
Sealing power	0.75 Kw
Vacuum pressure	0.1 pa
Sealing bars distance	505 mm
Sealing strip size	Length500×Width10 mm
Vacuum Pump Rate	20 m ³ /h
Vacuum cover material	Organic Glass
Power	220V, 50hz, 1.65 kW
Vacuum chamber size	Length 520×Width 520×Hight 130 mm
Machine size	Length 650×Width 580×Hight 960 mm
Machine weight	81 kg
