

DXDL42 Vertical Packaging Machine

DXDL42 Vertical Packaging machine is to pack bulk granular or powdery material into small bag. It can realize full-automatic packaging through metering, bag forming, coding, filling, sealing and other functions. This model is suitable for pillow bag and has a special design for powerful corrosion working circumstances.

- Volumetric metering, unlimited adjustment of packaging speed on the touch panel
- Double servo motor for accurate bag conveying and horizontal sealing
- Automatic shutdown when there are no films, materials and ribbons, films are broken, or protective doors are opened
- Clamp roll films pneumatically, centering adjustment to ruler
- Hot stamping printer is standard (Thermal transfer printer optional)

Specifications:

	DXDL42	DXDL62
Packaging Form	Pillow bag	Pillow bag
Load Capacity	250-1000g	1000-5000g
Packaging Speed	30-75 bags/min	20-40bags/min
Packaging Accuracy	Measuring cup metering: $\pm 4g$, $\leq 500g$; $\pm 1\%$, $> 500g$;	Measuring cup metering: $\pm 1\%$, $> 500g$; Combined scale metering: $\pm 2g$
	Combined scale metering: $\pm 2g$	
Roll Film Type	Paper-plastic film, aluminum-plastic film and other composite films	Paper-plastic film, aluminum-plastic film and other composite films
Roll Film Width	150-420mm	260-620mm
