

SZS230 Uphill Tablet Deduster

Uphill Tablet Sieving Machine SZS230 is developed by absorbing advanced technology at home and abroad. It has the dual functions of tablet improvement and dust removal so that it can work in conjunction with various tablet pressing machines and metal detection machines. This machine can be applicable in the field of pharmaceutical industry, food industry, chemical engineering, electronics, and so on.

In the design process, the machine adopts several novel designs, aiming to ensure that the production process can be safer and more standardized.

Specifications

Model	SZS230
Production capacity (pcs/h)	800,000 (Φ6)
Power (W)	150
Dedusting distance (m)	6
Max. tablet diameter. (mm)	Φ25
Power supply	220V/110V, 50Hz/60Hz, 1P
Compressed air	0.1 m ³ /min~0.1MPa
Vacuum cleaning	2.5 m ³ /min~0.1MPa
Noise (dB)	<75
Dimension (mm)	500*550*1350-1500
Weight (kg)	70
