High Speed Filling Capping Machine YMGXH

The High Speed Filling Capping Machine is researched and developed using advanced technology. It is used for mass production, and fits a variety of bottle and container shapes and capping. It has a compact structure, stable performance and very easy to maintain.

Features:

- Suitable for a variety of bottles/containers and caps in all shapes and materials.
- PLC controls, no bottle no filling and no capping.
- Rotary model bottle sealing, greatly improving efficiency of production.
- Complies with GMP requirements.

Technical Parameters:

- Volume: 10-500ml
- Capacity: 100-200pcs/min
- Power: 2kw
- Net weight: 800kg
- Dimension: 2440×1000×1700mm
