

Automatic Donut Making Machine GGNP-12

Main features of Automatic Donut Making Machine:

- Stainless steel material ensures machine quality and long life expectancy.
- Excellent quality. The machine has good workmanship, work stably, and can be very lasting.
- Portable. The machine has light weight of 8KG and very portable.
- Adjustable Donuts' thickness. Adjustable Donuts' thickness can also be adjusted by adjusting the amount of materials.
- Donuts size is adjustable. Can adjust donuts size by adjusting quantity of raw materials. If more, donuts bigger, if little, donuts smaller.
- Easy to clean. Donuts host machine is consist of two parts, inside part and outside part, inside part can be taken outside; Outside part can also open heating pipes, which can facilitate daily cleaning.
- Large container design. You can install 7L material to the container.
- Controllable temperature and settable time. Temperature is controlled by micro computer with $\pm 1^{\circ}\text{C}$, so it is very convenient and safe.

Technical Parameters:

Model	GGNP-12
Voltage/Frequency	220V 50Hz/380V 50Hz,6KW
Material	Stainless Steel
Capacity	400-1200pcs/H
Dimension	1100x550x650mm
