

## *DTDZ Double Chamber Vacuum Packing Machine*

The computer-type automatic vacuum packaging machine produced by our company is designed for packaging products, which contain much water. While it is also suitable for packing medicines, grains, fruits, dried food and so on, whether in solid, powder, paste or liquid material.

### **Product advantage:**

- To adopt Japanese control circuit and foreign advanced technology and experience of the same trade, its Electrical aspects using micro-computer controller to control all overall.
- The advantages are waterproof, moisture-proof, low failure rate, long life etc. These advantages make the device easy to clean, even if to wash the machine directly by water does not cause any electrical fault.
- The whole machine adopts 304 stainless steel plate, fulfill food hygiene standards.
- Its unique design of tilt table can guarantee no loss of moisture in products, so that the products with water content are easier to operate.

**Technical Parameters:**

<b>Model</b>	<b>DTDZ400B/2</b>	<b>DTDZ500B/2</b>	<b>DTDZ600B/2</b>
Upply voltage	220V,380V/50HZ,750W	220V,380V/50HZ,1500W	220V,380V/50HZ,1500W
Displacement	20m <sup>3</sup> /h	2X20m <sup>3</sup> /h	2X20m <sup>3</sup> /h
Vacuum chamber size	400×350×80mm	500×450×100mm	600×550×120mm
Work cycle time	15-40sec	15-40sec	15-40sec
Machine size	1000×540×920mm	1250×750×950mm	1450×750×990mm
Machine Weight	200kg	270kg	380kg
