

DDC-100H Automatic Horizontal Cartoner

DC100H Automatic Cartoning machine applies to the encase packing of blisters, vials, cosmetics, poker and similar stuff. This machine can fold leaflet, open carton and insert stuff with leaflet into cartons, printing batch number and close carton automatically.

This machine adopts horizontal configuration, PLC control system, photocell detector installed in each station enables stable running.

Technical Parameter

Max Boxing Speed	100 Boxes/min
Sheet Case Dimensions	>40×35×3.5mm <150×87×50mm
Cardboard Case Dimensions	Min: 70×25×14mm Max: 158×90×67mm
Cardboard thickness	250~350g/m ² (according cardboard size)
Main Motor Power	0.75kW
Power Connection	380V 50Hz (220V 60 Hz) 3 Phases 4 Wires
Air Compressor Pressure	0.5 Mpa >0.6m ³ /min
Air Consumption	≥ 0.9m ³ /h
Relative Humidity	Less than 70%
Working Noise	<85 dB
Overall Dimension(L×W×H)	2800×1350×2000mm
Weight	1200 Kg
