

Pre-made Pouch Granular Rotary Packaging Machine SGD6-200

SGD6-200/300 automatic pre-made pouch rotary packaging machine is self-developed by SG Packing Automation. This rotary packing machine model is designed for pre-made flat bag or stand-up pouch without zipper at bag top side. The pouch packing machine can realize automatic pouch feeding, date printing, bag opening, and material weighing filling, bag heat sealing and finished bag take-off. We have two machine models for customer reference depending on the packing material and bag size. Now doypack machine unit is very popular in snack food / grains / seeds / chemical granular packaging area.

Function & Features

- ◆ Realize Automatic Bag Feeding / Date Printing / Bag Opening / Material Weighing Filling / Heat Sealing / Finished Products Take-off;
