

## *QDX-S1 Automatic Cap Feeing Capping Machine*

Capping machine is one of the main equipment of automatic filling production line, it is a kind of sealing machine, widely used in glass bottle or PET bottles of screw cap sealing, because the screw cap with sealing fast, easy to open and re-open Screw cap, etc., so some non-gas liquid material, such as beverages, alcohol, spices and other similar packaging of the bottle with a large number of tuyere screw cap sealing. The use of inverter control, the application of the principle of the cam drive, disk divider positioning, implementation of the circular screw cap screw cap. Automatic put the cover on, screw cap, cap with magnetic combination of structure, the cap does not hurt the lid, screw cap easy to remove, different caps and bottles only need to replace a few parts, you can use a machine, and filling machine, labeling Machine connection production, food, beverages, medicine, daily chemicals, chemical industry, the best equipment.

Mainly used for all kinds of circular plastic, aluminum, iron screw cap screw cap, for food, pharmaceutical, cosmetic, pesticides, cosmetics and other industries of different bottle-shaped cap.

### **Technical data:**

<b>Model:</b>	<b>QDX-S1</b>
Voltage:	220V
Bottle neck diameter:	22-66mm
Output:	30-40(pcs/min)
Air consumption:	0.4MPA
Degree of automatic	Automatic
Power:	1.5(Kw)
Dimension:	2700*840*1900(mm)
