

High Quality Stainless Steel Vertical Continuous Sealing Machine SF-150

Work on plastic bag of Polyethylene, Polypropylene & Polyolefine Compounds in all sizes

Feature

- Strong sealing seam
- Unlimited sealing length
- Rugged Powder Coated All-Metal Construction
- Create sealing width Max. 14 MM
- Sealing belts are oriented horizontally to allow for easy access and high throughput
- Max loading weight of 3 KGS is ideal for most consumer good
- Sealing speed and temperature adjustable with film thickness to ensure sealing quality
- Electronic constant temperature mechanism
- Stepless speed regulating transmission motor
- Flexible height and wide changed with packet size code date, batch number

Specification

Sealing Width	Max. 14 MM
Film Thickness	0.03-0.80 MM
Sealing Speed	Max. 13 Meters Per Minute
Temperature Range	Max. 300 Degrees C
Conveyor Size	L 775 x W 140 MM
Conveyor Load	Max. 3.0 KGS
Power Supply	220 V, 50 HZ (customer voltage)
Power Consumption	600 W
Overall Size	L950 x W420 x H320 MM
Net Weight	25 KGS
Gross weight	35KGS
