

XT-125 Automatic Boxing Machine (bottled type)

This full-automatic boxing machine is a mechatronic high-tech product that could continuously run in conformity with GMP. It consists of product-feeding belt, product-absorbing-and-putting mechanisms, specification-putting-automatically mechanism, automatic coding mechanism, box-packing machine. The maximum boxing speed can reach 100 boxes/ min. Feeding mechanism connecting boxing machine is designed according to production equipments, thus it is convenient for users to operate it efficiency and economical. Its main features: it is easy to replace material standards and is appropriate for products with many standards.

Product application:

This machine is widely used for packing in medicine, food, daily use chemical and other industries. Such as bubble cap boxing for solid preparation (troche, capsula, etc.), ointment boxing for cream, paste, colloid, tray boxing for penicillin bottle, ampoule bottle, injector, bottle boxing for liquid and solid medicine, bag boxing for powder and granule products; bag boxing, filling boxing and box boxing for food, such as sweetmeats, chocolate, biscuit, bottle-filling liquor, frozen-products; flexible pipe, bag and bottle boxing for paste, cream, washing liquor, colloid and other daily use chemical; boxing for toothpaste and soap; boxing for electric bulbs, floppy, adhesive tape coiling, photographic film, etc.

Technical Parameters:

Boundary dimension (mm)	1300(L)×1200(W)×1500(H)
Packaging dimension(mm)	(L)49-120×(W)30-80×(H)14-50
Packaging speed	40-100 cases/min
Air consumption	5-8 L/Min
Total power	1.5kw
Voltage	220V/380V/50Hz
Weight(about)	950kg
